

Application of Simon Erani
Serial No. 09/922,233 filed 8/3/2001
Response of 5/17/2007 to Office Action of 11/17/2006

Listing of Claims

This listing of claims will replace all prior versions and listings of claims in the application:

1. (Previously Presented) A composition, comprising:
 - (a) Retinyl Palmitate Polypeptide;
 - (b) Ascorbylmethylsilanol Pectinate;
 - (c) Tocopheryl Polypeptide;
 - (d) Cholecalciferol Polypeptide; and,
 - (e) Niacinamide Polypeptide.
2. (Previously Presented) A composition as claimed in claim 1, wherein the ratio of said Retinyl Palmitate Polypeptide to said Ascorbylmethylsilanol Pectinate to said Tocopheryl Polypeptide to said Cholecalciferol Polypeptide to said Niacinamide Polypeptide is 95: 1.25: 1.25: 1.25: 1.25.
3. (Previously Presented) A composition comprising Ascorbylmethylsilanol Pectinate and Cholecalciferol Polypeptide.
4. (Previously Presented) A composition comprising Ascorbylmethylsilanol Pectinate,

Response of 5/17/2007 to Office Action of 11/17/2006

Cholecalciferol Polypeptide, and at least one component selected from the group consisting of: Retinyl Palmitate Polypeptide, Tocopheryl Polypeptide, and Niacinamide Polypeptide.

5. (Previously Presented) A composition comprising Ascorbylmethylsilanol Pectinate, Cholecalciferol Polypeptide, and at least two components selected from the group consisting of: Retinyl Palmitate Polypeptide, Tocopheryl Polypeptide, and Niacinamide Polypeptide.
6. (Previously Presented) A composition as claimed in claim 1, further comprising glycolic acid.
7. (Previously Presented) A composition as claimed in claim 2, further comprising glycolic acid.
8. (Previously Presented) A composition as claimed in claim 3, further comprising glycolic acid.
9. (Previously Presented) A composition as claimed in claim 4, further comprising glycolic acid.
10. (Previously Presented) A composition as claimed in claim 5, further comprising glycolic acid.
11. (Previously Presented) A composition as claimed in claim 1, wherein said composition is provided as part of a substance for application to the skin.
12. (Previously Presented) A composition as claimed in claim 11, wherein said substance is a gel.
13. (Previously Presented) A composition as claimed in claim 11, wherein said substance is a

creme.

14. (Previously Presented) A composition as claimed in claim 11, wherein said substance is a lotion.
15. (Previously Presented) A composition as claimed in claim 11, wherein said composition is provided at a concentration of 1-10%.
16. (Previously Presented) A composition as claimed in claim 11, wherein said composition is provided at a concentration of 2-5%.
17. (Previously Presented) A composition as claimed in claim 11, wherein said composition is provided at a concentration of 10-20%.
18. (Previously Presented) A composition as claimed in claim 11, wherein composition is provided at a concentration of approximately 1.5%, and wherein said substance further comprises approximately 3% glycolic acid.
19. (Previously Presented) A method comprising:
 - providing a composition for application to human skin to improve the appearance of the skin, said composition comprising MDT-5;
 - said MDT-5 consisting of a form of Vitamin A, a form of Vitamin C, a form of Vitamin E, a form of Vitamin D, and a form of Vitamin B3;
 - said form of Vitamin A consisting of Retinyl Palmitate Polypeptide;
 - said form of Vitamin C consisting of Ascorbylmethylsilanol Pectinate, such that said

composition does not include Ascorbic Acid Polypeptide;
said form of Vitamin E consisting of Tocopheryl Polypeptide;
said form of Vitamin D consisting of Cholecalciferol Polypeptide; and
said form of Vitamin B3 consisting of Niacinamide Polypeptide.

20. (Previously Presented) A method as claimed in claim 19, wherein the ratio of said Retinyl Palmitate Polypeptide to said Ascorbylmethylsilanol Pectinate to said Tocopheryl Polypeptide to said Cholecalciferol Polypeptide to said Niacinamide Polypeptide is 95:1.25:1.25:1.25.
21. (Previously Presented) A method comprising:
providing a composition for application to human skin to improve the appearance of the skin,
said composition comprising Ascorbylmethylsilanol Pectinate and Cholecalciferol Polypeptide.
22. (Previously Presented) A method as claimed in claim 21, wherein said composition further comprises at least one component selected from the group consisting of: Retinyl Palmitate Polypeptide, Tocopheryl Polypeptide, and Niacinamide Polypeptide.
23. (Previously Presented) A method as claimed in claim 21, wherein said composition further comprises at least two components selected from the group consisting of: Retinyl Palmitate Polypeptide, Tocopheryl Polypeptide, and Niacinamide Polypeptide.

Response of 5/17/2007 to Office Action of 11/17/2006

24. (Previously Presented) A method as claimed in claim 19, wherein said composition further comprises glycolic acid.
25. (Previously Presented) A method as claimed in claim 20, wherein said composition further comprises glycolic acid.
26. (Previously Presented) a method as claimed in claim 21, wherein said composition further comprises glycolic acid.
27. (Previously Presented) A method as claimed in claim 22, wherein said composition further comprises glycolic acid.
28. (Previously Presented) A method as claimed in claim 23, wherein said composition further comprises glycolic acid.
29. (Previously Presented) A method as claimed in claim 19, wherein said composition is provided at a concentration of 1-10%.
30. (Previously Presented) A method as claimed in claim 19, wherein said composition is provided at a concentration of 2-5%.
31. (Previously Presented) A method as claimed in claim 19, wherein said composition is provided at a concentration of 10-20%.
32. (Previously Presented) A method as claimed in claim 19, wherein composition is provided at a concentration of approximately 1.5%, and wherein said substance further comprises approximately 3% glycolic acid.
33. (Previously Presented) A method as claimed in claim 20, wherein said composition is

provided at a concentration of 1-10%.

34. (Previously Presented) A method as claimed in claim 20, wherein said composition is provided at a concentration of 2-5%.
35. (Previously Presented) A method as claimed in claim 20, wherein said composition is provided at a concentration of 10-20%.
36. (Previously Presented) A method as claimed in claim 20, wherein composition is provided at a concentration of approximately 1.5%, and wherein said substance further comprises approximately 3% glycolic acid.
37. (Previously Presented) A method as claimed in claim 21, wherein said composition is provided at a concentration of 1-10%.
38. (Previously Presented) A method as claimed in claim 21, wherein said composition is provided at a concentration of 2-5%.
39. (Previously Presented) A method as claimed in claim 21, wherein said composition is provided at a concentration of 10-20%.
40. (Previously Presented) A method as claimed in claim 21, wherein composition is provided at a concentration of approximately 1.5%, and wherein said substance further comprises approximately 3% glycolic acid.
